**Description:** Position Title: Lead .NET Developer  
Location: Vernon Hills , IL 60061  
3 month contract to hire.  
Permanent Salary Range 75K to 85K

Must be US Citizen or Green Card Holder

Purpose of the Position: Responsible for system architecture specifications, object and data modeling, database design, programming, quality assurance and implementation support. The lead .NET developer will drive the software lifecycle methodology. The lead .NET developer will mentor developers through interaction and example.

Essential Functions:

- " Works with business teams to document requirements and business needs using use case and process modeling.
- " Understand business and adapt to business objectives and goals to provide functional and non-functional solutions to problems.
- " Effectively collaborates with other team members to determine an optimal solution for the problem.
- " Develop application framework to provide a baseline for developers to follow.
- " Must be available to maintain the systems built during and after work hours.
- " Is responsive and customer service oriented to all stakeholders via phone, email, etc. during the engagement. Maintains open and courteous communication.
- " Employ object-orientated analysis and design techniques including use case analysis, object modeling and database schema design to ensure business requires and design goals are met.
- " Develop and maintain detailed design specifications for use by the development team.
- " Participate in project planning with business stakeholders to provide the most effective use of software development time against the highest return on investment objectives.
- " Lead and mentor developers through direct interaction, documentation and example.
- " Provide project estimates through experience and project itemization.

Qualifications:

- " Bachelor of Science in Computer Science, or equivalent knowledge/experience.
- " 4+ years of .NET experience.
- " Understanding of object-oriented design and programming techniques.
- " Ability to work effectively with and support the needs of the project team members.
- " Strong written and verbal communication skills.

- " Possess creative problem solving skills.
- " Understanding of multi-tiered and multi-layered applications.
- " Must have experience and understanding of the .NET 2.0 Framework, [ASP.NET](#), XML, SSL, IIS, MS SQL Server and T-SQL.
- " Experience with technologies such as COM, DCOM, Web Services, Remoting, MSMQ, Java Script, FileMaker, Remedy and iSeries is a plus.
- " Understanding of .NET 3.0 Framework and Microsoft Communications Foundation is a plus.
